

Doro Watch

What does it do?

An analogue watch that tracks the wearer and enables them to talk to our 24 hour call centre whenever they need help or guidance

How does it help?

Gives the location details of the wearer when they need help, ensuring assistance arrives at the right place as soon as possible, can also detect when the watch is over 50 yards away from the base

Who does it help?

Anyone who may need to summon help outside the home and people who get confused about where they are. Also, those who wish to remain independent and enables to raise assistance whilst out and about

How does it work?

A sim chip inside the watch allows voice calls and two way speech at the press of a button. Our monitoring centre can find the device on a map and arrange for assistance to attend promptly

How do you operate it?

Press and hold the button on the side of the watch to call for help. You can also set safe zones that alert loved ones if someone has wandered into an area that is not safe to be in
